BASE, BUSINESS CASE & RFP

Outcome driven Base & Business Case study and RFP content development.

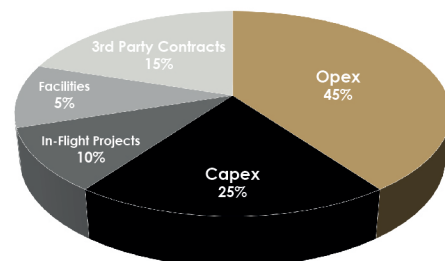

Why Base and Business Case models are important

The purpose of the business case is to develop a procurement (sourcing) model and to outline the rationale for pursuing an IT service delivery model supported by a managed services contract. The business case model could be presented in various formats. There are key elements to include into the model such as scope of work, service levels and the associated expenditures. The model should be driven through an assessment of scope of work data gathering, that can form the RFP content for service levels and delivery model.

The Key elements of a base and business case model

The base case model can be structured in various data model. The key elements of base case model could be categorized into Run, Grow and Transform expenditure. These categories can include Opex, Capex, Third Party Contracts, In-Flight Projects and Facilities such as Data Centers and Computer rooms. This view can support the IT budget reallocation activities and the future service delivery model to support your business requirements and to drive the IT and Business innovation with current technology solutions such as IoT, Multi-Cloud, SOC & SIEM, Blockchain and more.
